Social and Personal

The most important society event of to-day will be the marriage of Miss Jenny Walter Jeffers, daughter of Mr. and Mrs. John B. Jeffers, to Neil Dunlop Sills, formerly of Sydneyham, Ontario, Canada, but now of this city. The ceremony will take place this evening at 8 o'clock, at the home of the bride's parents, 211 Park Avenue, with only the immediate families and a few intimate friends present. Dr. W. C. James will officiate, and a string orchestra will play during the ceremony and for the reception following. The house will be decorated with quantities of lovely flowers for the occasion, and the drawing rooms will be arranged with white blossoms and lighted tapers against a background of palms and trailing vines. In the dining room, decorations will be in pink roses. Tall baskets of Killarney roses will be used everywhere, and the candles will be shaded in rose color. The bride will enter the drawing room with her father, who will give her away. Her wedding gown is an exquisite affair of white tulle, satin, made with a court train and a drapery of chiffon and real lace. The chiffon drapery is caught at intervals with crystal ornaments, and the bodice is also trimmed in crystal. Her veil of illusion will fall from a Juliet cap of deep pearls and will be caught to the train of her gown with sprays of lilies of the valley. The bride's bouquet will be a shower of white orchids and lilies of the valley. Miss Selden Chandler Jeffers will be the sister's maid of honor. COUNT BERCHTOLD IS DEVOTED TO RACING

New Austro-Hungarian Minister of Foreign Affairs Maintains Large Stable.

BY LA MARQUISE DE FONTENAY. VERY MAN HAS HIS hobby, and the hobby of those who are called upon to play a great role in the world are always interesting. Thus, the new Austro-Hungarian Minister of Foreign Affairs and Chancellor of the Dual Empire, Count Leopold Berchtold, is like Lord Rosebery, passionately devoted to racing, and has for years maintained a large racing stable and stud farm, of European celebrity, at Arpadhalm, one of his places in Hungary. His colors are familiar on most of the Continental racecourses. They are rose-colored jacket and white cap. In the racing calendar just issued by the Jockey Club at Vienna the count figures as the second or third latest winner of stakes for the year 1911.

People in Austria and in Hungary are quite as enthusiastic about racing as they are here in America. Indeed, the love of horses and of horse racing, also the gambling instinct, are far more developed in all classes of society in the Dual Empire than in this country. The count has been a member of the Jockey Club since 1895, and on the more recent occasions this punishment has fallen much less heavily upon the count than it has upon other officers who are uncongenial, and otherwise objectionable, and who are incapable of adapting themselves to the ancient traditions and ethics of the game. There have been several ragging scandals in the grounds since, and on the more recent occasions this punishment has fallen much less heavily upon the count than it has upon other officers who are uncongenial, and otherwise objectionable, and who are incapable of adapting themselves to the ancient traditions and ethics of the game.

The first of the Kinloch baronets was Lord Provost of Edinburgh. Most of the others have been soldiers. The principal country seat of the family is Gilmerton, in Haddingtonshire. In addition to the Order of the Bath and the Victorian Order, Sir David Kinloch possesses a number of other military distinctions.

The recent trial in New York of a prisoner who was both deaf and dumb in a manner in which offenders thus afflicted are dealt with by the British law, upon the command of a jury, a prisoner is charged with any crime, a jury is first impeached to determine whether the defendant is "mute of malice," or "by visitation of God," the latter is found to be the case, the next question before the court is as to whether he is capable of understanding the proceedings of the trial. For this purpose, experts in the deaf and dumb language are always employed. These experts are of the opinion that the accused, by virtue of his affliction, would not be able to follow the proceedings intelligently, even though mentally balanced enough to plead guilty, or not guilty, the usual course is for the judge to direct the jury to return a verdict of "not sane."

The judge thereupon, by virtue of a statute dating from the year 1860, orders him to be detained in custody during His Majesty's pleasure, and he is consigned to the world-famed prison for the criminal insane at Broadmoor. (Copyright, 1912, by the Brentwood Company.)

Helped a Lady In Distress

After Many Trials, In Which Her Daughter Also Figured, Help Comes at Last to Mrs. Smith of Goldsboro.

Goldsboro, N. C.—"I was forty-eight years old, and suffered greatly from neuralgia," writes Mrs. Etta A. Smith, of Goldsboro.

"I also had many other distressing symptoms not uncommon among ladies of my age."

They were pains in shoulders and arms, in the left side and left thigh.

My head ached, too, occasionally.

A physician treated me and tried his best to help me, but could give me no relief.

I then took Cardui, the woman's tonic, with the result that I am now well.

My daughter has also used it and was greatly benefited.

I can recommend Cardui to other suffering women."

When a lady who has had to suffer from troubles peculiar to her sex finds, at last, as Mrs. Smith did in Cardui, a medicine which restores her to health and energy, can you blame her for wishing others to know of her good fortune?

Reading of Mrs. Smith's helpful experience should encourage you to try what Cardui will do for you.

Second Life Guards and the Horse Guards, held an extraordinary meeting at the Guards Club, declaring that by virtue of their ancient privileges and prerogatives they were amenable to no one except the sovereign, and that, under the circumstances, Lord Roberts, as commander-in-chief, had no right to deprive Lord Kinloch of his command. This point of view was submitted to King Edward. But, after due consideration, the King declined to intervene, though he took many subsequent occasions as showing his marked consideration and personal regard for Colonel Kinloch.

The failure of the King to reverse Lord Roberts's action was followed by another meeting of the officers of the brigade of guards, at the Guards Club, in Pall Mall, to discuss the situation, and it was virtually decided on that occasion that ragging must and would continue, despite all military regulations to the contrary, as the only means of ridding the regiments of the brigade of officers who are uncongenial, and otherwise objectionable, and who are incapable of adapting themselves to the ancient traditions and ethics of the game.

RACIAL TRAITS OF THE JAPANESE

Dr. Nitobe Addresses Large Audience at University of Virginia.

(Special to The Times-Dispatch.) Charlottesville, Va., March 26.—Dr. Inazo Nitobe, the Japanese exchange professor, who is extended by the Japanese government to the University of Virginia and five other American universities, resumed his lectures at the university last night on "The History and Institutions of Japan" in the course of the last two weeks he has been visiting many places of interest in Virginia, addressing schools, colleges and societies, and in other ways fulfilling one of the purposes of the exchange professorship arrangement, which, however, is but a better known to the people of America.

Next year Dr. Alderman, in his capacity as president of the University of Virginia, together with the heads of the other five universities on the exchange foundation, will select a man to represent the United States in Japan on a similar mission from the American point of view.

Dr. Nitobe's subject last night was, "Japanese Race and Racial Traits." His audience was the largest he has faced at the university, and the reception of the one on March 8, at College Hour in Cabell Hall, when he was formally welcomed. He was in great good humor, and passed from the serious speech of the scholar to the nimble wit of the raconteur with pleasing facility. In tracing the genealogy of the Japanese people, he related a number of the ancient legends, which have delighted cultured men and women of all lands for ages. His conclusion, however, was that the race is known positively of the beginning of his people, but it is more likely that the earliest settlers came from Korea, and others somewhat later from China and the Malay Peninsula. Methinks of what he said, tend to show that there were also immigrants from Western Europe.

Discusses Racial Traits. Passing to racial traits, Dr. Nitobe said that the average height of the man is five feet two inches, and of the woman, four feet eight inches. The men are usually six feet tall, and the Emperor is six feet two inches. "However," said Dr. Nitobe, "this is not because he is Emperor." The average height of the woman is five feet two inches, and of the Emperor, six feet two inches. "However," said Dr. Nitobe, "this is not because he is Emperor."
